**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**RESTRICITON**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 14-17, 19, 23-25, drawn to key having different operation sections, classified in class 379, subclass 368.
  - II. Claim 18, drawn to a single lever-type key, classified in class 200, subclass 5a.
  - III. Claims 20-22, drawn to a combination of a particular function of a movement key and an execution key doubling as a calling key, classified in class 379, subclass 433.06.
  - IV. Claims 26-30, drawn to a display format and the movement direction of the information items, classified in class 345, subclass 810.

2. The inventions are distinct, each from the other because:

Inventions Groups I to IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involves Group I having a key which has different sections, this type of key is not capable of use together with Group II which is a single lever-type key. Group I also has different effects which does not require the particular movement and functions and display format as it is required in Groups III and IV.

3. Group I also contains different species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

In Group I, claims 14-17, 19, 23-25, it contains the following different species:

Specie 1, claims 15-17, 19, 25, key layouts;

Specie 2, claim 23, display format and selection of items;

Specie 3, claim 24, a specific calling function.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic for Group I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

.....  
**NOTE:** a similar restriction requirement was issued in the parent case (09/192,303).

In this application, Group I is considered as the original presentation, other groups have been amended to include some non-elected subject matters of the parent case into this case. **Applicant is advice to elect the original presentation (Group I) to avoid a non-responsive election.**

**When Group I is elected, only Specie 1 should also be elected as the original presentation to avoid a non-responsive election.**

.....  
5. A telephone call was made to Mr. Billy Raulerson on 12-07-04 to request an oral election to the above restriction requirement, Mr. Raulerson called back on 12-10-04 to request a written restriction.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon.-Fri. from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on 703-305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
